

Final Circular (08/2022)

PANGEA AUSTRIA 2022

Beyond Earth Science Frontiers

Conference Convenor

Department for Applied Geosciences and Geophysics
Montanuniversitaet Leoben
Peter-Tunner-Straße 5
8700 Leoben

Location and Date

Montanuniversitaet Leoben
Franz-Josef-Straße 18
8700 Leoben

Date: 10 - 13/09/2022

Conference Language(s)

English/German

General information

PANGEO AUSTRIA 2022, to be held in Leoben from 10th to 13th September 2022, will offer a broad technical program with >200 confirmed contributions in 20 regular sessions and 2 workshops.

Information about the conference venue, as well as travel and accommodation options can be found at the conference website:

<http://pangeo.unileoben.ac.at>

For further assistance, please contact:

pangeo@unileoben.ac.at

Covid regulations

Following the current Covid regulations of Montanuniversitaet Leoben for public events, supervised Covid self-tests will be taken at the entrance to the venue on Sunday 11/09/2022 and Tuesday 13/09/2022.

According to the current Covid status “green”, no FFP2 masks are required at the venue and in the lecture rooms. However, mandatory mask wearing may be decided in the case of a change in Covid status. Please follow the updates at the conference website and via e-mail.

All participants of the pre-conference program on Saturday are advised to take a voluntary Covid self-test to ensure maximum safety for all attendees. Please follow the usual Covid rules (e.g., avoid grouping in enclosed spaces) throughout the event.

Please understand that these requirements are general access rules of Montanuniversitaet Leoben for employees, students, and guests. The mandatory tests may be cancelled in case of changing regulations.

Conference program & information for presenters

As a session chair or speaker, please make sure to be on site in time. Presentations must be uploaded before the session start. No delays will be accepted.

Presentations must be prepared in MS Powerpoint 16:9 with no specific format requirements. Please provide your presentation on a virus-checked USB disk. **Presentation slots are scheduled for 20 mins** (15 min presentation + 5 min discussion). Please strictly adhere to the time limit.

Posters should be prepared in A0 size with no specific format requirements. Please make sure that your poster is up in time for the poster session. Preferably posters should be up for the whole conference duration. Information on poster award and poster session presentations will be communicated at the conference office upon registration.

IMPORTANT: Presentations and posters must not contain apparent advertising content.

Please find the final session program at the end of this document and online at:

<https://pangeo.unileoben.ac.at/conference-program>

Please follow program updates via the website.

Field trip and framework program

Icebreaker party

The icebreaker party will take place at the main venue on Saturday 10/09/2022 starting from 07:00pm. You may also pre-register for the conference there.

Field trips

Participation fees for the excursions are posted at the conference website and must be paid at the conference office (main entrance to the venue). You will receive a ticket which will be checked at the bus entrance. Final information about meeting points, etc. will also be communicated at the conference office upon check-in.

Please make sure to be on site in time and bring your ticket (handed out upon payment at the conference office). Also, please bring weather-proof clothing and shoes, and be prepared to spend a day in the field. The participation fee includes a lunch package for the day of the excursion.

Meeting point for the pre-conference excursions on Saturday 10/09/2022 will be the entrance to the main venue (new building of the MUL main campus). The departure time for both excursions will be 09:00am sharp. Please be there at least 15 minutes prior to departure with your registration tickets ready.

Excursion 1: Sat 10/09/2022 (09:00) [Erzberg](#)

(F. Melcher, R. Galler)

Iron ore has been mined at the “Steirischer Erzberg” for more than 1300 years. Today, VA Erzberg produces about 3 million tonnes of siderite concentrate annually. The metallogenetic evolution of this giant ore system continues to be a matter of debate. During the excursion, we will visit key outcrops in the active mine area to discuss the evolution of the mineralization in the framework of the regional geology of the Erzberg.

Excursion 2: Sat 10/09/2022 (09:00) [Aflenzer Bürgeralm Panorama Road - A spectacular section through the rocks of the Triassic at the southern rim of the Mürzalpen nappe](#)

(G. Bryda)

The one-day excursion will start in the stratigraphically youngest parts of the Noric nappe, leading along the panorama road to the Aflenzer Bürgeralm and afterwards to the Schönleitenhaus. Following an introduction to the regional geology and tectonics of the area, the rocks at the southern edge of the juvavic Mürzalpen nappe, which are best exposed along the Panoramastraße, will be presented. The focus will be set on the facies and stratigraphic position of these rocks, as well as the temporal-spatial development of their depositional environment in the forefront of the Triassic carbonate platforms.

Excursion 3: Tue 13/09/2022 (13:00) *Styromag Magnesite (Oberdorf)*

(P. Kroissenbrunner, H. Mali)

The Upper Austroalpine nappe system of Austria hosts several magnesite deposits of the Veitsch type of which seven deposits are still in mining operation. Metasomatic deposits of the Veitsch type are hosted by Palaeozoic carbonates, form coarsely crystalline stratiform lenses, layers, and irregular bodies. All of them are overprinted by Alpine metamorphism. Pinolitic magnesite structure, several generations of dolomite and secondary talc formation are some characteristics of these deposits. The excursion will visit one of the deposits mined by Styromag GmbH at Oberdorf, Wald or Hohentauern which are hosted by the Carboniferous Veitsch nappe of the Austroalpine Veitsch-Silbersberg nappe system.

Excursion 4: Wed 14/09/2022 (09:00) *Spodumene (Lithium) Project Wolfsberg*

(T. Unterweissacher, H. Mali)

European Lithium's Wolfsberg Project is targeting spodumene-bearing pegmatites within the Koralpe-Wölz nappe system. The company successfully completed a positive pre-feasibility study (PFS) in Q2 2018. The PFS was based only on current measured and indicated resources of 6.3 Mt at 1.17% Li₂O. Additional exploration work within the framework of a detailed feasibility study revealed the available resources more realistically. The excursion participants will have the possibility to visit the underground exploration adit as well as the core shed within the city of Wolfsberg.

Keynote and public lecture

Opening keynote

Mike Simmons (Halliburton, UK)

Who needs geoscientists? Career options in a time of energy transition

Historically, many geoscientists have been employed in searching for and extracting resources, either hydrocarbons, minerals, or water. Concerns about the environmental sustainability of geological vocations appear to be reducing the number of students studying geoscience, at least in many developed western nations. What then are the options for those wishing to pursue a career in geology? The need for geoscientists is paramount in a time of energy transition, be that in traditional spheres of employment or in what may be termed "sustainable geoscience," although these are not mutually exclusive.

Growing global population and economic growth are likely to drive an ongoing rise in energy demand as the century progresses. Despite the growth in renewables, the energy mix for the next few decades is likely to continue to include a significant contribution from natural gas, oil, and, to a lesser extent, coal. The challenge is to be as efficient as possible in the exploration for these resources and to locate those with the lowest carbon footprint created by their exploitation ("green oil"). This means a focus on reservoir geology so that well placements and trajectories are optimized.

These skills will also allow geoscientists to contribute to solutions that may help achieve carbon neutrality targets. Carbon capture and sequestration (CCS) is likely to grow in importance and requires geoscientists who can model subsurface repositories and the behaviour of fluids injected

into those repositories. Other avenues exist in engineering geology in relation to the challenges of installing new wind farms and for the construction of measures to mitigate the impacts of climate change that are already inevitable. A growing number of geologists are engaged in investigating the potential of geothermal energy.

The global improvement of living standards and society's ongoing appetite for technology places a demand on the supply of raw materials (e.g., copper and rare earth elements) that could quickly outpace our known reserves. Geoscientists are needed to locate new deposits, including those in the oceans. As the global population continues to expand towards 11 billion people, water supply is likely to be one of the major challenges society faces as the century progresses. Hydrogeologists are needed to locate and manage aquifers as climate evolves and to protect them from pollutants.

Academic geologists can provide support to all of these industrial activities, but there is also much fundamental research to be carried out. It is now over 50 years since the advent of the last major paradigm shift in geoscience – plate tectonics – another is surely overdue. We still have much to learn about processes operating in and on Earth today and in the past, and the evolution of life. Holistic Earth systems science approaches can be useful, for example, by using the past to model climate evolution. One exciting avenue is the impact of the digital revolution on geoscience. Data science is providing new scientific insights and is transforming all resource industries, contributing to efficiency and associated environmental benefits. The future geoscientist needs to be technology and data science literate, but with an underpinning of sound geoscience knowledge. We do not know where this exciting phase of technology and data science change will take geoscience, but it is clear that geoscientists will be needed to support society as it enters a period of unprecedented change.

Public Monday evening lecture

Kurt Stüwe (Universität Graz)

Zur Geschichte der Steirischen Landschaft

Die Landschaft der Steiermark mit ihren Bergen, Tälern und Ebenen formte sich zwar über geologische Zeiträume, aber dennoch gab es erstaunlich große Veränderungen auch innerhalb der relativ kurzen Entwicklungszeit der Hominiden in den letzten fünf Millionen Jahren. Die ursprünglich über den Semmering ins Wiener Becken fließende Mur änderte ihren Verlauf allmählich nach Graz, die Enns floss noch über den Schoberpass in die Mur, viele der steirischen Vulkane existierten noch nicht und der Schöckl oder der Hochschwab waren noch keine Berge, sondern erhoben sich kaum merklich über das flach-wellige Hügelland. Der Vortrag illustriert Aspekte dieser verblüffenden Landschaftsentwicklung mittels spektakulärer Luftaufnahmen.

10:00-10:20	Coffee Break + Poster			
	Hydrogeology	Engineering Geology	Young Sediments	Seismology
10:20	Haas, J.; Birk, S.; Retter, A.; Griebler, C.: Ein integrativer Überblick über die Grundwasserqualität im Murtal: Von der Quelle bis zur Slowenischen Grenze	Schünemann, V. & Villeneuve, M.: Development of a demonstration project for the construction of a compressed air storage in existing disused mining galleries based on geonumerical modelling	Jawecki, C.; Weil, J.; Bauer, M.; Lappé, K.: 3D Ground Model of Vienna: from geological concept to geotechnical application	Akhverdiev, A.; Afanasenkov, A.; Lavrik, A.: Pore-pressure and geomechanical parameters prediction based on elastic inversion results
10:40	Kokimova, A.; Collenteur, R.; Birk, S.: Identification of recharge components and unknown stresses in alluvial aquifers using time series modelling	Maier T. & Villeneuve M.: Physical and Geomechanical Characterization of Volcanic Rocks from Styria	Schmalfuss, C.; Firla, G.; Lüthgens, C.; Neuhuber, S.; Fiebig, M.: Early results from the ICDP project DOVE (Drilling Overdeepened Alpine Valleys): Revisiting the Hole of Bad Aussee	Fuchs, F. et al.: Distributed acoustic sensing: opportunities, challenges, and data highlights from railway installations in Austria
11:00	Seelig, M.; Kainz, S.; Hausleber, M.; Obwegs, M.; Eybl, J.;		Miesebner, L.; Müller, M.; Friedl, M.; Dietzel, M.;	

	<p>Winkler, G.: Time Series and Trend Analysis of Austrian Springs</p>	<p>Hippler D.: The Weissensee – A natural carbonate mineral factory</p>
11:20	<p>Kainz, S.; Wagner, T.; Krainer, K.; Avian, M.; Olefs, M.; Haslinger, K.; Winkler, G.: A thermokarst-related debris flow event at an active rock glacier in the Ötztal Alps (Tyrol, Austria)</p>	<p>Wagreich, M.: Stratigraphy of the Anthropocene</p>

12:00- 12:45	Poster Award & Closing
-------------------------	-----------------------------------

POSTER SESSION PROGRAM

Advanced Structural and Geochemical Characterization of Geomaterials

Epov, A.; Chernonozhkin, S. M.; Puschenreiter, M.; Tognacchini, A.; Meisel, T. C.; Prohaska, T.; Irrgeher, J.; Hiller, J. M.; Gopon, P.; Bertrandsson Erlandsson, V.;	Assessing analytical methods for high precision Ni isotopic analysis in rhizosphere samples from Ni hyperaccumulating plants
Moser, U.; Čeplak, B.; Aldrian, A.; Hočvar, S.; Kralj, P.; Šala, M.; Vollprecht, D.; Žibret, G.; Irrgeher, J. Müller, S.; Misch, D.; Skerbisch, L.; Shi, X.	A green future from a contentious past: gold and critical metals in a historic arsenic mining district Strassegg (Styria)
Nasiri, A.; Ravi, K.; Prohaska, M.	MURmap - Holistic geochemical tracking of elements and their sources in the Mur/Mura River Catchment
Neuschitzer, D.; Scheiblehner, D.; Sprung, A.; Wibner, S.; Gross, D.; Antrekowitsch, H.	Porosity – depth trends for Vienna Basin mudstones: Validation of broad ion beam – scanning electron microscopy as a seal prediction tool
	Mono-energetic Micro-computed tomography(µCT): A reliable potential alternative to mineral Investigation of formation rock
	Formation of intermediate decomposition products (PAHs) during methane pyrolysis in a liquid metal bubble column reactor

Applied Mineralogy

Baumann, C.; Galan, I.; Sakoparnig, M.; Dietzel, M.;	Growth of brucite on portlandite crystal surfaces
Rudic, O.; Hofrichter, M.; Steindl, F.; Wohlmuth, D.; Dietzel, M.; Mittermayr, F.;	Metallurgic slag-based geopolymmer materials in the circular economy
Kojic, I.; Dojcincovic, B.; Stojanovic, K.;	Preliminary study of copper (II) ions removal from wastewater using solid residue obtained by co-pyrolysis of lignite and high-density polyethylene mixture
Lontschar, K.; Mittermayr, F.; Perez, G.; Dietzel, M.; Galan, I.	Vanadium leaching from thermochromic cement
Ratz, B.; Baldermann, A.; Stamm, F. M.;	Formation and environmental significance of short-range order allophanehisingerite solid solutions
Sammer, T.; Nasiri, A.; Feichter, M.; Ravi, K.;	Tackling challenges concerning the integrity of downhole cement/rock during underground gas storage: an interdisciplinary approach
Stamm, F. M.; Balderman, A.; Dietzel, M.;	Silicon isotope fractionation during the formation of amorphous (alumino)silicate phases
Zoegl, I.; Grengg, C.; Mueller, B.; Wedenig, M.; Kluge, T.; Boch, R.; Dietzel, M.	High-resolution spatiotemporal pH monitoring of coupled CO₂ degassing and CaCO₃ precipitation dynamics

Aspects of Seismology

Nasir, A.; Hintersberger, E.; Decker, K.	The temporal evolution of seismicity and variability of Gutenberg-Richter b-values along the Vienna Basin Transfer Fault System
--	--

Economic Geology

Baumann, C.; Raith, J. G.; Paulick, H.; Weibold, J.; Auer, C.; Stranzl, C.; Dietzel, M.; Ebner, F.;	Magnesite deposits in the Eastern Alps – integrative approaches
Geringer, A.; Rohrhofer, S.; Melcher, F.; Reitner, H.; Benold, C.; Schuster, R.; Auer, C.; Paulick, H.; Grasemann, B.; Hubmann, B.; Large, D.;	SEDEX deposits in the Graz Paleozoic – investigations to the exploration potential with the Arzberg deposit as calibration region
Pittarello, L.; Fanesi, E.; Kolitsch, U.; Giuli, G.	The natural occurrence of native iron in basalt from Bühl near Weimar, Kassel, Germany: a new study based on historical samples

Schubert-Hlavac, G.; Mali, H.; Schuster, R.; Steiner, R.; Rohrhofer, S.; Zahrl, M. A.; Sweda, M.; Horvat, C.; Knoll, T.	Prospecting for spodumene pegmatites by statistical evaluation of trace elements in magmatic muscovite
---	---

Wallner, D.; Bertrandsson Erlandsson, V.; Raith, J. G.; Rantitsch, G.; Melcher, F.; Ellmies, R.	Mineralogical and Geochemical Characterization of the Dolostone Ore Formation, Kunene Region, Namibia
---	--

Werdenich, M.; Reitner, H.; Schuster, R.; Melcher, F.; Rantitsch, G.; Mali, H.;	Investigation of occurrences of high-quality quartz mineral resources in south-eastern Austria: First results from the Rittis quartzite
---	--

Geo-Energy	
-------------------	--

Aghayeva, V.; Sachsenhofer, R. F.; van Baak, C., G., C.; Bazyramova, S.; Coric, S.; Vincent, S.J.:	Chemostratigraphy of the Cenozoic succession in Azerbaijan: Implications for petroleum systems in the Caspian Basin
--	--

Ajuaba, S.; Sachsenhofer, R. F.; Meier, V.; Gross, D.; Omodeo Sale, S.; Schnyder, J.	Hydrocarbon potential of Permo-Carboniferous rocks (Weiach, Switzerland)
--	---

Schreilechner M. G.; Eichkitz, C. G.; Binder, H.; Hasni, M.; Neuhold, C.; Schön, J.; Wessely, G.; Keglovic, P.; Eckerstorfer, H.; Kulich, J.; Götzl, G.; Leusbrock, I.; Tugores, C. R.; O'Donovan, K.; Falay, B.; Haslinger, E.; Auer, R.; Friedrich, R.; Heinemann, G.; Weissl, M.; Flores Orozco, A.; Decker, K.	Aquifer Thermal Energy Storage Vienna Mapping active faults in the region of Vienna to minimize seismic risks associated with geothermal energy production
--	---

Geophysics	
-------------------	--

Akhverdiev, A.:	Prediction of reservoir properties in carbonate and clastic sediments on the South Ural Foreland based on the results of elastic inversion
-----------------	---

Akhverdiev, A. & Aleynikov, I.:	Seismic data Quality Cintron based on analysis of Semblance and Envelope attribute
---------------------------------	---

Eichkitz, C. G.; Schreilechner, M. G.; Arndt, D.; Madritsch, H.; Spillmann, T.; Merz, K.; Hölder, A.	Unterschiede in der Störungskartierung von potentiellen Endlagern aufgrund alternativer seismischer Processingvolumen
--	--

Jud, M.; Eichkitz, C. G.; Schreilechner, M. G.; Binder, H.	Festgesteinseismik in Metamorphiten
--	--

Schattauer, I.; Hintersberger, E.; Ullrich, C.; Supper, R.; Motschka, K.	The usage of GIS edge-approximation tools on vintage aerogeophysical data with focus on fault interpretation
--	---

Schlögel, I.; Apoloner, M.-T.; Weginger, S.	Die „Geräusche der Erde“ rund um und im Traunsee – Projekt TiefenRausch
---	--

Scholger, R., Fritz, I., Nell, O.:	Geophysical prospection of the Pliocene volcanic massif Königsberg-Klöch in Southeast Styria (Austria)
------------------------------------	---

Scholger R.; Sarc, R.; Lorber, K.; Reiselhuber, K.:	Geoelectric monitoring of irrigation experiments at the Rautenweg landfill (Vienna)
---	--

Geoscience and Archeology	
----------------------------------	--

Oettel, L.; Degenhart, G.; Tropper, P.:	Mikrocomputertomographische Untersuchungen an Blasen- und Plattenschlacken aus dem prähistorischen Verhüttungsplatz Kundl (Unterinntal, Tirol)
---	---

Scholger, R. & Cech, B.:	Geophysical prospection of the ancient gold mining region “Karth” in Lower Austria
--------------------------	---

Tropper, P.; Gammel, T.; Töchterle, U.	Subduction in a vessel: petrology of eclogite-tempered ceramics from the Kiechlberg (Thaur, Tyrol)
--	---

Tropper, P.; Krüger, H.; Hejny, C.; Wallner, J.	Mineralogische Untersuchungen (XRD und DTA-TG) zur Zusammensetzung und zum Brennverhalten ausgewählter Tonproben hinsichtlich archäologischer Fragestellungen zur lokalen Keramikproduktion
Wagner, S.; Degenhart, G.; Tropper, P.; Köchl, R.; Gilg, H. A.	Modern garnet quality control: Micro-XRF and micro-computer tomographic investigations on Zillertal garnet raw products and jewellery pieces.
Hydrogeology and Hydrochemistry	
Arnhof, M.; Winkler, G.; Hilberg, S.;	Hydrochemische Charakterisierung von Blockgletscherquellen mit karbonatgestein dominierten Einzugsgebiet (Beispiel Lantschfeld)
Fachathaler P.; Misch, D.; Zhang, C.; Behm, M.; Scholger, R.; Kusnirak D.; Malone, E.;	Hydrogeophysical survey in the St. Ilgener valley revealing subsurface structure and groundwater pathways
Theyer, M.; Prandstätter, L.; Kuschnig, G.; Decker, K.;	Porosity and permeability of fractured Triassic carbonates forming the main ground water reservoirs of the 1 st Vienna Water Main in the Schneeberg Massif (Lower Austria)
Yousefi, N.; Rinder, T.; Hilberg S.;	The mine drainage from the spoil tip of a Bavarian pitch coal mine – a history of unmonitored natural attenuation
IGCP 710: Western Tethys meets Eastern Tethys	
Koukal, V.; Wagreich, M.; Eder, L.;	Slope basin depositional model of the Paleogene Gosau Group of Gams on top of the incipient Eastern Alpine orogenic wedge (Austria)
Mrdak, M.; Gawlick, H.-J.; Djakovic, M.; Djeric, N.; Sudar, M.;	Drowning of the Ravni carbonate ramp and the overlying late Middle Anisian Bulog Formation in the Seljani area, Montenegro, Dinarides
Mrdak, M.; Wegerer, E.; Đerić, N.; Đaković, M.; Gawlick, H.-J.	Explosive volcanism as precursor of the Julian "Carnica" Event in northern Montenegro (Durmitor Mega-Unit)
Wagreich, M.; Pavlishina, P.; Dochev, D.; Koukal, V.;	Stratigraphy of the Turonian-Coniacian boundary interval in the Gosau Group of Gams, Styria
Igneous and Metamorphic Petrology	
Bernabe, E. & Tropper, P.	Mineral chemical evolution of metapelites along the prograde Eoalpine metamorphic field gradient in the southern ÖC (Vinschgau, S-Tyrol, Italy)
Hollinetz, M. S.; Huet, B.; Schneider, D. A.; McFarlane, C. R. M.; Rantitsch, G.; Grasemann, B.	Thermodynamic modeling and in situ U-Th-Pb geochronology constrain polymetamorphism and a large Eo-Alpine metamorphic gap between the Koralpe-Wölz and Drauzug-Gurktal nappe systems (Austroalpine Unit, Eastern Alps, Austria)
Karner-Rühl, K.; Hauzenberger, C. A.; Skrzypek, E.; Fritz, H.	Metamorphic evolution and geochronology of Variscan remnants in the Eastern Alps: the crystalline "Schollen" in the Greywacke Zone
Meier, V.; Breitkreuz, C.; Groß, D.; Ohser, J.	Perlitic textures in silica-rich rocks: Re-evaluation of volcanological and glass technical models
Santitharangkun, S.; Hauzenberger, C.; Skrzypek, E.; Gallhofer, D.	P-T-t Evolution of the Pongyang Gneiss, Inthanon Zone, NW-Thailand
Paleontology	
Hofmann, C.-C.; Sachse, M.; Huet, B.	Pollen assemblages of subhumid and sclerophyllous plants and intrazonal water plants revealed by SEM pollen analysis of mid-Miocene deposits of Entrischenbrunn (Bavaria, Germany)
Regional Geology and Geodynamics	

Haas, I.; Kurz, W.; Gallhofer, D.; Hauzenberger, C.; Skrzypek, E.; Fritz, H.	The Permo-Mesozoic cover sediments of the Seckau-Schlaining nappe system and their provenance – a detrital zircon story
